WHO AM I?

I am an Italian Senior Software Engineer, with a sound background in Mathematical Physics. I worked on several fields, before moving to the Netherlands on 6th of April 2022. I would like to think at myself like a serious professional, strongly driven and project oriented. Nevertheless, I have lot to learn and I find interesting and challenging to grow with junior Engineers along the way. I've been told I could make outstanding presentations. I am better in person though.

EXPERIENCE

2022 – 2023

Senior Software Engineer

TOPIC Embedded Systems.

I was assigned to ASML as part of a recently out-farmed team; my main contribution was helping the robustness of the latter, testing and integrating already developed modules, implementing CI/CD in the w.o.w. of the team in collaboration with local T&I team and developing almost the whole design of a State Machine Framework.

C / C++ / Python / Bash / CI/CD / UML and EA / SAFe

2018 – 2021

Senior Software Engineer

ProMarket

I worked for the fintech startup ProMarket, developing in Python and in C++ a networking framework between the investment clients and the strategy-computing servers on top of the ZeroMQ library. I also developed in Python a sentiment analysis engine.

C / C++ / Python / Bash / Networking / ZeroMQ

2015 – 2018

Software Developer

Eveilidia

I worked for Eveilidia, an IT company. My job was the debugging and maintaining of web applications' back-end running on Linux Fedora.

Python / Bash / Fedora Linux / Web Services

2012 – 2013
freelance

Developer and Tester

Ubuntu Italian Community Forum

I proposed the idea and took part in the development of a command line parser, a C version of the Python argparse module.

It is available for free download and use on GitHub: Vincenzo1968/myoptParser

Python / C / Bash / FOSS / Remote Colab

2006 – open
part time

Owner

Almalu Trastevere - Cocktail Bar

My family started from scratch a business in entertainment, mainly frequented by English speaking customers. This gave me, moreover, the opportunity of improving my language skills on a daily basis. This business is still working and mainly managed by my older brother, Alessio, who is managed by our mother.

2010 – 2012

PHP - MySQL Developer

SirCup

I worked for SirCup, a company which organizes sport tournaments. I developed and maintained MySQL databases and relative data handling and presentation PHP routines, specifically for their soccer tournaments.

Miscellanea

After I won a scholarship, I worked for a year as a librarian in Roma 3 University library. I've been tutoring students in mathematics and physics for several years, preparing them for any grade level, especially from high school to university. I worked for a couple of years at Chiostro del Bramante, a museum in Roma, keeping watch on artworks during exhibitions.

EDUCATION

Master's Degree in Mathematical Physics

Universita' Roma Tre

My research work concerns Non-Equilibrium Statistical Mechanics. Specifically, I focus on the relaxation to equilibrium of metastable thermodynamic systems. I'm therefore used to implement mathematical models of physical systems, both stochastic and deterministic.

Bachelor's Degree in Physics

Universita' Roma Tre

Physics

High School

Pio IX

Humanities-focused highschool

LANGUAGES

Italian - native

English - C1 IELTS Based Result

Dutch - Self Studying

HOBBIES

I love Art in almost any expression, open air activities when it comes to sport and hiking, cooking and reading when home.

NON PROFIT

I try to be a better version of me every day, working in charities and being open mostly.
