leon.pozzati@gmail.com

WHO AM I?

Senior Software Engineer with a strong academic background in [Mathematical Physics](#) and over 10 years of experience across [fintech](#), [semiconductor](#), and [high-tech industries](#).

Proven expertise in [developing and testing](#) robust software systems using [C](#), [C++](#), [Python](#), and [Bash](#) in [Agile environments](#).

Recognized for being [results-oriented](#), [collaborative](#), and [adaptable](#), with the ability to [work effectively](#) both [independently](#) and in [cross-functional teams](#).

C / C++

Python

Bash

Linux

Jenkins

Git

OOP/UML

Agile

EXPERIENCE

2025

Senior Software Engineer

Thermo Fisher Scientific

- [Developed and maintained automation software](#) for Transmission Electron Microscopes (TEMs) in the [semiconductor field](#), used by Intel and Samsung for [anomaly detection in microchips](#).
- Collaborated on [design](#), [development](#), and [testing](#) of software in [C/C++](#), [Python](#), and [Bash](#)
- Followed [Agile methodologies](#) throughout the product lifecycle
- Contributed to [optics automation solutions](#) to improve [system efficiency and robustness](#)

2024

Senior Software Engineer

ASML

- Joined a [core team](#) responsible for building a [new universal light system](#) for ASML's lithography machines
- [Designed and implemented](#) software modules using [C/C++](#), with scripting in [Python](#) and [Bash](#)
- Followed [Agile practices](#) to coordinate development cycles, testing, and integration from the ground up

2022 – 2023

Senior Software Engineer

ASML

- Assigned to the core [Safety and Diagnostic](#) team for [ASML's High-NA EUV lithography platform](#)
- Improved system robustness by [integrating](#), [refactoring](#), and [testing](#) both [new and legacy code](#)
- [Collaborated with the T&I](#) (Test & Integration) team to integrate [CI/CD](#) pipelines and streamline deployments in the [way of working of the team](#)
- [Authored the software design documentation](#) for safety-critical components

2018 – 2021

Senior Software Engineer

ProMarket

- Developed a [low-latency messaging framework](#) in [C++](#) and [Python](#) using the [ZeroMQ](#) library [to connect trading clients with strategy computation servers](#)
- Designed and implemented components of a [sentiment analysis engine](#) to support [trading decisions based on market news and signals](#)
- Contributed to [backend robustness and scalability](#) in a high-pressure [fintech startup environment](#)

2015 – 2018

Software Developer

Eveildia

- [Maintained and debugged](#) the backend of custom [on-demand book publishing platforms](#) deployed on [Linux Fedora](#)
- Developed and improved [server-side routines](#) in [Bash](#) and [Python](#) for web-based publishing workflows
- Ensured [operational stability](#) and [performance](#) of [internal services](#) supporting client-facing systems

2012 – 2013
freelance

Developer and Tester

Ubuntu Italian Community Forum

- [Initiated and co-developed](#) a [command-line parser in C](#), inspired by [Python's argparse](#), to support Linux scripting users
- Conducted [testing and documentation](#) for usability within the [Ubuntu Italian user base](#)
- Published the code as [myoptParser](#) on GitHub: Vincenzo1968/myoptParser

2010 – 2012

PHP - MySQL Developer

SirCup

- *Designed, developed, and maintained MySQL databases* to support *data tracking* for *sport tournament operations*
- Implemented *PHP routines* for *dynamic data handling and web presentation* of *tournament results and schedules*
- Contributed to the *automation and customization* of tournament management on the *company's platform*

Miscellanea

After I won a scholarship, I worked for a year as a *librarian* in Roma 3 University library. I've been *tutoring students in mathematics and physics* for several years, preparing them for any grade level, especially from high school to university. I worked for a couple of years at Chiostro del Bramante, a museum in Roma, *keeping watch on artworks* during exhibitions.

EDUCATION

Master's Degree in Mathematical Physics - 110/110 cum Laude

Universita' Roma Tre

My research work investigates the *relaxation to the equilibrium* of a *supersaturated gas* through a *critical droplet* which triggers the *phase transition* into liquid.

After writing down both a stochastic and a deterministic *mathematical model* of this metastable thermodynamic system, I wrote the *C++ simulations*, run them and carried out a massive *data analysis in Python* finding out interesting results in the context of *Non-Equilibrium Statistical Mechanics*.

Bachelor's Degree in Physics

Universita' Roma Tre

High School

Pio IX

Humanities-focused Catholic highschool run by Benedictines Monks.

LANGUAGES

Italian native
English C1 - Academic IELTS
Dutch Self Studying

HOBBIES

I love Art, open air activities like horse riding and hiking, cooking and reading when home.

NON PROFIT

I try to be a better version of me every day, working in charities and being open mostly.

PERSONAL PROJECTS

3D Scanner

Along with the *Open Source Lab at Lochal Library* in Tilburg, I am building a 3D scanner based on the *OpenScan* project. The idea is to have fun learning the fundamentals of *stereophotogrammetry* and *3D scanning and printing*.

Domotics and IoT

I am assembling a *modular home assistant*, in a project that started with a manager for the garden and the automation of an Ikea roller blind.

The frame is 3D-printed with the support of Lochal library, prototype schematics and circuit board's layout are made with *KiCad*, and the software runs on a *Raspberry Pi 4*.

Chat Bot Training

In order to *train a chat bot on a specific domain*, I am writing a Software Engineering Notebook with a massive list of references.

This project *purpose is mostly educative*.
