WHO AM I?

I am an Italian Senior Software Engineer, with a sound background in Mathematical Physics. I worked in several fields, before moving to the Netherlands on 6th of April 2022. I like to think of myself as a serious professional, strongly driven and project oriented. I have a lot to learn and I find interesting and challenging to grow both with junior and more experienced Engineers, able to focus on solitary projects as well.

Bash
C / C++
Python
Jenkins
Git

EXPERIENCE

- 2022 – 2023 **Senior Software Engineer** TOPIC Embedded Systems.
I was assigned to **ASML** as part of an *out-farmed team* dedicated to the *Safety and Diagnostic* of the *lithography systems*.
My main contribution was *helping the team robustness*, *implementing, testing and integrating* both *new and legacy code*, *integrating CI/CD* in collaboration with the *local T&I team* and writing the *software design for the High-NA EUV machine*.
C/C++ / Python / Bash / CI/CD / UML / Agile / svn / testing
- 2018 – 2021 **Senior Software Engineer** ProMarket
I worked for the *fintech startup* ProMarket, developing in Python and in C++ a *networking framework* between the investment clients and the strategy-computing servers on top of the *ZeroMQ* library. I also developed in Python part of a *sentiment analysis engine*.
C/C++ / Python / Bash / Networking/ZMQ / ML
- 2015 – 2018 **Software Developer** Eveilidia
I worked for Eveilidia, an IT company. My job was the *debugging and maintaining* of *web applications' back-end* running on Linux Fedora.
Python / Bash / Fedora Linux / Web Services
- 2012 – 2013 **Developer and Tester** Ubuntu Italian Community Forum
freelance
I proposed the *idea* and took part in the *development* of a *command line parser*, a C version of the Python *argparse module*.
It is available for *free download and use* on GitHub: Vincenzo1968/myoptParser
Python / C / Bash / FOSS / Remote Colab
- 2010 – 2012 **PHP - MySQL Developer** SirCup
For SirCup, a company which organizes sport tournaments, I *developed and maintained MySQL* databases and relative *data-handling and presentation PHP routines*, specifically for their soccer tournaments.
PHP / MySQL / data-handling
- 2006 – open **Owner** Almalu Trastevere - Cocktail Bar
part time
My family started from scratch a business in entertainment, mainly frequented by English-speaking customers. This gave me, moreover, the opportunity of improving my language skills on a daily basis. This business is still working and managed by my mother and older brother.

Miscellanea

After I won a scholarship, I worked for a year as a [librarian](#) in Roma 3 University library. I've been [tutoring students in mathematics and physics](#) for several years, preparing them for any grade level, especially from high school to university. I worked for a couple of years at Chiostro del Bramante, a museum in Roma, [keeping watch on artworks](#) during exhibitions.

EDUCATION

Master's Degree in Mathematical Physics - 110/110 cum Laude

Universita' Roma Tre

My research work investigates the [relaxation to the equilibrium](#) of a [supersaturated gas](#) through a [critical droplet](#) which triggers the [phase transition](#) into liquid. After writing down both a stochastic and a deterministic [mathematical model](#) of this [metastable thermodynamic system](#), I wrote the C++ simulations, run them and carried out a massive data analysis in Python finding out interesting results in the context of [Non-Equilibrium Statistical Mechanics](#).

Bachelor's Degree in Physics

Universita' Roma Tre

High School

Pio IX

Humanities-focused Catholic highschool run by Benedictines Monks.

LANGUAGES

Italian native
English C1 - Academic IELTS
Dutch Self Studying

HOBBIES

I love Art, open air activities like horse riding and hiking, cooking and reading when home.

NON PROFIT

I try to be a better version of me every day, working in charities and being open mostly.

PERSONAL PROJECTS

3D Scanner

Along with the [Open Source Lab at Lochal Library](#) in Tilburg, I am building a 3D scanner based on the [OpenScan](#) project. The idea is to have fun learning the fundamentals of 3D scanning and printing.

Domotics and IoT

I am assembling a [modular home assistant](#), in a project that started with a manager for the garden and the automation of an Ikea roller blind. The frame is 3D-printed with the support of Lochal library, prototype schematics and circuit board's layout are made with [KiCad](#), and the software runs on a [Raspberry Pi 4](#).

Chat Bot Training

In order to [train a chat bot on a specific domain](#), I am writing a Software Engineering Notebook with a massive list of references. This project [purpose is mostly educative](#).
